A junior frontend developer with 6 months of professional experience at Advocado Interactive Solution, skilled in Vue.js, HTML, CSS, Tailwind CSS, Bootstrap, and JavaScript. Proven ability to build and deliver web applications through real-world projects and professional roles. Eager to contribute frontend skills and a collaborative mindset to a growth-oriented development team.

WORK EXPERIENCE/WORK HISTORY

Advocado Interactive Solution Sdn. Bhd. – *Subang Jaya, Selangor* Sept 2025 – Mar 2026

Frontend Developer

Developed and maintained responsive frontend UI layout for a high-traffic online sports platform, contributing to key features within a collaborative development team using **Vue.js, CSS, Bootstrap, and JavaScript**.

- Architected and developed a Tournaments page featuring card-based layouts with timeline and column views, incorporating pagination and full mobile responsiveness using **Vue.js Bootstrap, and CSS**.
- Built the user account interfaces, delivering consistent and user-friendly UI in the platform.
- Develop a Live page displaying Upcoming Live and Ongoing Live stream videos, delivering a frontend UI layout that are ready for backend integration.
- Implemented **Internationalisation (i18n)** across the platform to support 3 languages (Mandarin, English, and Malay), enabling a localized experience for a diverse regional user base.

Outlier (Scale AI) – *remote, freelance job* Jan 2025 – June 2025

AI Prompt Writer/AI Trainer

Validated and refined AI model responses to enhance accuracy, developing technical prompts for diverse scenarios to support client-facing applications.

- Reviewed and improved 50+ weekly AI responses against quality rubrics, providing detailed feedback that increased model accuracy and relevance for technical use cases.
- Created and tested coding-related prompts (Python, JavaScript) to refine AI model performance, applying analytical skills to assess prompt quality and ensure compliance with project objectives.

Roche Services & Solutions (RSS) APAC – *Subang Jaya, Selangor* June 2023 – Oct 2023

Internship (IT Service Desk)

Provided first-level technical support for software issues across O365, Windows, and Google environments, resolving user queries efficiently.

- Resolved 40+ weekly user queries from China regional offices, troubleshooting software issues across different platforms, managing user accounts and remotely accessing devices using Bomgar and PowerShell.
- Collaborated with APAC teams via ServiceNow and Google Chat, escalating complex issues to senior teams while maintaining high user satisfaction and productivity levels.
- Contributed to the Knowledge Database by posting troubleshooting articles and facilitating knowledge-sharing forums, enhancing team and user support processes.

EDUCATION

Universiti Tunku Abdul Rahman - *Kampar, Perak* Oct 2021 – June 2025

Bachelor of Information Systems (Hons) Information Systems Engineering

PROFESSIONAL SKILLS

- **Programming Languages:** HTML, CSS, PHP, JavaScript, Python, Java
- **Frameworks:** Vue.js, Tailwind CSS, Bootstrap, Node.js, Express.js, React
- **Databases:** SQL (MySQL, Oracle, PostgreSQL, MS SQL), NoSQL (MongoDB)
- **Technical Skills:** Git, GitHub, Web Development, RESTful API, i18n, Remote Access (Bomgar), PowerShell, Prompt Engineering, Microsoft 365, ServiceNow ticketing system

PROJECTS

Final Year Project June 2024 – May 2025

Online UTAR Appointment Management System

- Individually developed a web-based system using HTML, Tailwind CSS, PHP, JavaScript, MySQL, and XAMPP, enabling UTAR students and lecturers to schedule and manage appointments efficiently.
- Implemented FullCalendar (JavaScript Library) for time slot visualisation, displaying events on a daily, weekly, and monthly view to the users. Users could click on an available time slot to book an appointment.
- Utilized XAMPP and Agile SDLC methodology to ensure iterative development, testing, and deployment, achieving a 30% reduction in appointment scheduling time during functionality testing.

Personal Project Mar 2026 - Present

Personal Portfolio Website

- Developed a single-page portfolio website using Vue.js and Bootstrap, featuring smooth scroll navigation, a typewriter effect, and responsive layout across all screen sizes.
- Integrated vue-i18n for multilingual support (English, Mandarin, Bahasa Melayu) to broaden accessibility for different audiences.
- Deployed on Vercel with continuous deployment — every push to GitHub automatically triggers a new production build.

Personal Project Mar 2026 - Apr 2026

Weather App

- Built a responsive weather application using Vue.js and Bootstrap, consuming the OpenWeatherMap REST API to display real-time weather data and 5-day forecasts.
- Implemented features including geolocation-based weather detection, Celsius/Fahrenheit toggle, and localStorage to persist the last searched city.
- Deployed the application on Vercel with environment variable configuration for API key security.
